Applicant

HUNATECH CO., LTD. et al

1. The applicant is hereby notified that International Preliminary Examining Authority transmits here with the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details in the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

INTERNATIONAL PRELIMINARY EXAMINATION

International application No.

PCT/KR2002/002216

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-37	YES
	Claims		NO
Inventive step (IS)	Claims	1-37	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-37	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

1) prior art

The following documents are referred:

D1 : KR 10-241671 B1
D2 : KR 2002-0002292 A
D3 : KR 1991-0006784 B
D4 : US 6320639

D1 and D4 relate to a method of manufacturing an LCD and an apparatus for the same wherein pixels which are separated from each other and limited by an outside area of pixels form a matrix. D2 relates to a method and an apparatus for forming a pattern on a surface of a panel substrate comprising a step of electrically charging pattern-forming material particles, a step of jetting out the electrically charged pattern-forming material particles through a nozzle by applying electrostatic force to the pattern-forming material particles to form a pattern, and a step of fixing the pattern onto the panel substrate. D3 relates to an apparatus and a method for the production of diamond films with excellent diamond characteristics such as uniformly depositing diamond films with the thickness of a diamond film and at a high vapor deposition speed.

2) Novelty, Inventive Step and Industrial Applicability

A method for manufacturing a light guiding panel comprising: transferring a transparent substrate to pass below an outlet of an injection nozzle at a predetermined speed; making a predetermined amount of minute particles contained in a container free-fall in a unit time; forming a desired distribution of recesses formed on the surface of the transparent substrate; and a mixing transfer unit which mixes free-falling minute particles with high speed air and forcibly transfers the mixed particles through a transfer pie. However, the above cited documents do not show components of Claims 1-37. Therefore, Claims 1-37 of the present invention meet the criteria set out in PCT Article 33(2)-(4). Accordingly, the present invention is considered to have novelty, to have an inventive step and to be industrially applicable compared to conventional techniques.
